

Paraben's New P2 Enterprise Shuttle Performs Live Forensic Exam or Responds Covertly to an Incident

New Product in Paraben's P2 Paradigm Represents Significant Advance in Enterprise Forensics

Pleasant Grove, Utah—February 2, 2007—Paraben Corporation, a leader in digital forensics, announces the addition of the P2 Enterprise Shuttle to its line of enterprise solutions. The P2 Enterprise Shuttle is a specialized tool that can perform a live forensic exam over a network or respond covertly to an incident. P2 Enterprise is the first tool in the Paraben arsenal that is designed to not only help manage forensic incident in a small to large enterprise environment, but also manage data with active memory, snapshots of desktops, and acquisitions of partial to complete drive data.

With P2 Enterprise Shuttle, consultants and internal audit/IT departments can respond to an incident, collect the crucial evidence they need, and produce a detailed report, all without having to spend thousands for more complex and less effective solutions. Remote forensics at its best with fast deployments and multiple agent communication P2 Enterprise Shuttle is comprehensive, and effective as an enterprise forensic solution.

“Paraben's Enterprise solutions are the next evolution in digital forensics.” said Amber Schroader, CEO of Paraben Corporation. It embodies a paradigm shift to innovative, specialized tools for each area of an exam, allowing an investigator to focus efforts where they are needed with tools designed for each specific area of focus. For examiners responsible for incident response, our P2 Enterprise Shuttle is the perfect live forensic solution.”

Features of the new P2 Enterprise Shuttle include:

- Drive Acquisition
- Volatile Data Information
- Client Snapshot
- Network Searching
- Reporting and More

The many features of the P2 Enterprise Shuttle can be examined on a trial basis by downloading a demonstration version of P2 Enterprise Shuttle, available at http://www.paraben-enterprise.com/p2es_features.html.

Paraben offers a variety of options for training and deployment of P2 Enterprise, both the full and Shuttle editions.

About Paraben Corporation

Established in 1999, Paraben Corporation quickly became a leader in handheld forensics with the release of PDA Seizure. After releasing Cell Seizure, the first commercially available tool for cell phone forensics, Paraben combined the two tools to create Device Seizure, a comprehensive handheld forensic solution. Paraben also has many digital forensic software titles for forensic analysis of hard drives & media, as well as specialized tools for enterprise level forensics, training classes, and forensic hardware. About Paraben Enterprise Solutions

Paraben's latest focus has been in enterprise forensics. P2 Enterprise takes a new approach to forensics with a truly proactive forensic solution. P2 Enterprise monitors your enterprise and learns users' behavior. Any violation of pre-set rules or deviations from normal behavior triggers an automatic forensic response. For examiners responsible for incident response, P2 Enterprise Shuttle is the perfect live forensic solution.
