

Data Review Made Simple

Enable others to easily examine data from your E3 Platform cases with E3:View. It's like a key that provides secure access to your case files. An E3:View license grants reviewers the same comprehensive view you have, including:

- **Powerful Search:** Find relevant information quickly with features like full-text indexing, multilingual searching, and OCR technology for scanned documents.
- **Data Exploration:** Easily navigate case data using data viewers and bookmarking tools.
- **Reporting:** Generate reports to share findings with others.

Using E3:View is Easy:

- **Share the E3:View License:** Grant access to reviewers.
- **Send Your Case Data:** Provide the case file containing data from various sources (Cellebrite, Graykey, E3 Mobile Data, or Forensic Containers).
- **Reviewers Access the Data:** They can explore the case data just like you would with the full E3 Platform.

In short, E3:View streamlines case review by providing secure access to your data without requiring everyone to have a full E3 Platform license.

Licensing

E3:View offers two licensing options: Web License and Hardware Key License.

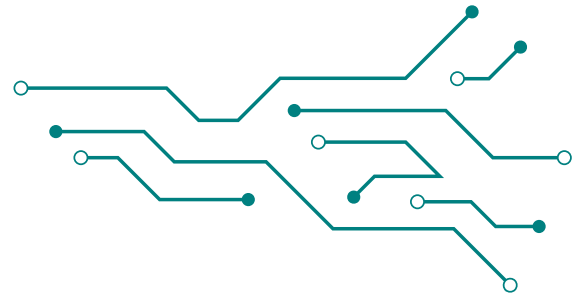

- **Web License:** This is a software-based license that requires internet access.
- **Hardware Key License:** This option utilizes a hardware key locking the review tool to a single machine.

Both licenses enforce a single-user rule. Only one person can access E3:View with a license at any given time.

License are SaaS based:
Monthly \$39.00 USD
Annual \$359.00. USD

THE E3 VIEW PROCESS

Streamlined Collaboration

E3:View streamlines collaboration by simplifying data sharing within your investigations.

Here's how:

- **Seamless Data Transfer:** After processing evidence from computers, smartphones, or the cloud using E3, you can effortlessly share it with others involved in the case via E3:View.
- **Preserved Context:** Your crucial bookmarks and the processing steps you applied are automatically transferred along with the data. This ensures everyone reviewing the case has the full context of your analysis.
- **Faster Review:** By receiving pre-organized data with your insights already embedded, reviewers using E3:View can hit the ground running, saving valuable time spent on initial exploration.

In short, E3:View eliminates the need for manual data preparation, allowing for efficient collaboration and faster case resolution.

The screenshot displays the E3:View software interface. On the left, a 'Case Content' tree shows a hierarchy of folders including 'E3 data case', 'Parsed Data', 'Received Data', 'Authentication Data', and 'Installed Applications'. The main window shows a table of installed applications with columns for icon, application name, version, internal application name, category, and manufacturer. A search dialog is open over the table, and a 'Reports Wizard' dialog is also visible in the bottom right corner.

Icon	Application Name	Version	Internal Application Name	Category	Manufacturer

E3:View empowers collaborative case reviews.

Once the review begins, both investigators and attorneys gain access to the full suite of E3's powerful analysis tools. This allows them to:

- **Search Together:** Utilize features like full-text indexing, OCR, and multi-language searching to uncover relevant information efficiently, all within the same view.
- **Seamless Exploration:** Navigate the case data collaboratively using intuitive data viewers and bookmarking tools to maintain focus and share important findings.
- **Unified Reporting:** Generate reports directly from E3:View, ensuring everyone works with the same data and interpretations for streamlined case management.

This collaborative environment fosters communication and understanding between investigators and attorneys, leading to more efficient casework.
