

Paraben Boosts Digital Forensics Education

Paraben empowers universities and colleges to cultivate the next generation of cybersecurity professionals through its Educational Packages.

These packages offer:

- **Customization:** We understand every institution has unique needs. Paraben tailors package to fit your curriculum, ensuring students get the most relevant training.
- **Flexibility:** Choose from a variety of packages to match your program's focus.
- **Seamless Integration:** Our licensing will work both in a live lab environment and a virtualized lab environment.

By partnering with Paraben, you equip students with the skills and tools they need to excel in the ever-evolving field of digital forensics and cybersecurity.

Capabilities

E3 has a unified interface that allows seamless processing of a vast array of digital evidence:

- **Traditional Devices:** From computers and laptops to external storage media.
- **Mobile Devices:** E3 expertly tackles the complexities of modern smartphones, extracting critical data for comprehensive analysis.
- **The Internet of Things (IoT):** E3 keeps pace with change offering robust capabilities for examining data from connected devices.

E3 streamlines the investigation process, allowing students to work within a single, intuitive environment, regardless of the evidence source. This translates to tiered labs throughout the educational process.

Discounted Educational Pricing

Paraben offers exclusive educational pricing for software licenses and lab access, tailored for digital forensics curriculum development. The licensing covers E3:UNIVERSAL, providing access to all features in that license tier. With the comprehensive E3 license, you can create courses focusing on computers, mobiles, or cloud specializations. E3 allows for flexible curriculum development, adapting to your courses' growth each semester.

Software Licensing Options

All licensing is for 12 months of access to the E3:UNIVERSAL software license. Licensing for the instructor is complimentary with any student license purchase. The instructor license can be used in the classroom and outside of the classroom for course development.

- Bulk License 25 Students \$6,295.00/annually
- Bulk License with all Labs Listed for 25 Students \$12,995.00/first year \$6,295.00/second year

Smaller or larger tiers of licenses are available through a custom quote by reaching out to sales@paraben.com.

Student Classroom Labs

All labs come with a lab file and instructional questions for students and instructor answers.

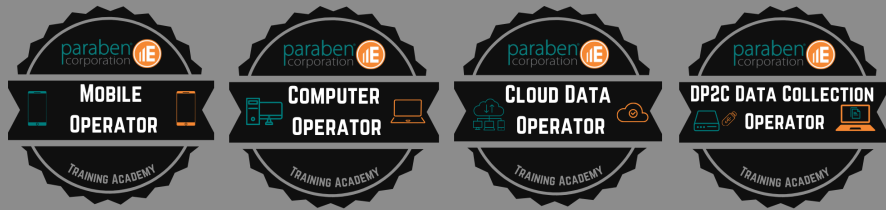

- Network Mail Archive
- Local Mail Archive
- Windows File System Image
- Android Lab Files (Multiple Available)
- iPhone Lab Files (Multiple Available)
- IoT Lab Files (Multiple Available)

Optional add-on items include access to StrongHold Faraday Bags at a discounted price.

Customization

Paraben supports our higher education customers with access to training for all instructors, either complimentary or very discounted. Most of our training is available online and on demand. If there is a custom package or needs an educational institution needs our team is happy to see where we can help whether it be with course development or grant submissions.

Student Certifications

Career Expansion with Certification

Empower Your Students' Careers with Discounted Certifications

In addition to our comprehensive educational packages, Paraben provides students with the opportunity to earn industry-recognized certifications at a reduced cost. These certifications can be:

- Discounted as an add-on
 - Purchase them separately at a special price for students enrolled in your program.
- Bundled within a package
 - Integrate certifications directly into your curriculum for a streamlined learning experience.

Available Certification Packages:

Student Certification Package \$69.00
Includes PMO, PCO, PCDO, PDP2C

PMO-Paraben Mobile

The mobile operator course is designed to help beginners become proficient in using the E3 Forensic Platform with mobile-related evidence processing. This 4-hour online course includes lectures and lab exercises. Participants who complete this course receive PMO certification.

PCO-Paraben Computer Operator

The computer operator course is designed to help beginners become proficient in using the E3 Forensic Platform with computer-related evidence processing. This 4-hour online course includes lectures and lab exercises. Participants who complete this course receive PCO certification.

PCDO-Paraben Cloud Data Operator

The cloud data operator course is designed to help beginners become proficient in using the E3 Forensic Platform for cloud-related evidence processing. This 4-hour online course includes lectures and lab exercises. Participants who complete this course receive PCDO certification.

Paraben DP2C Operator Free to Students

The DP2C operator course is designed to help beginners become proficient in computer and media acquisition using the free DP2C tool.

By incorporating discounted certifications into your program, you equip your students with the skills and credentials they need to hit the ground running in the digital forensics field. We offer package holders discount codes to share with students for \$20.00 off the Student Package price.
