

What's new in version **4.5**

Electronic Evidence Examiner and Image Analyzer

RELEASE NOTES

DILITHIUM EDITION

4.5

What's new in version 4.5

What are Paraben's licensing options?

Paraben offers two licensing options for E3. Paraben's streamlined Membership Tiers, approach forensic licensing in bundles with everything your lab needs into one predictable cost. Paraben also offers traditional perpetual licensing options.

Membership Licensing

By moving away from fragmented tool management, Paraben's new model provides a comprehensive "All-In-One" solution centered on the powerful **E3 Platform**.

The **Three Pillars of Every Membership** are designed to ensure you never have to choose between software, education, or assistance:

Immediate access to the latest E3 forensic engines, Image Analyzer, and Paraben AI technology.

Technology

On-demand training modules are included at every level of membership, ensuring your team is always certified and proficient.

Training

Top tier dedicated technical support to keep your investigations moving without delay.

Service

Why Choose a Membership Tier?

Predictable Budgeting: Choose between flexible monthly credit card payments or annual subscriptions via credit card, PO/Check. You can even categorize the cost under "Software" or "Training" budgets to fit your agency's procurement rules.

Elite Capabilities: Higher tiers unlock advanced AI-driven event correlation and priority access to expert consulting and private referral networks.

Scalability: Start with the tier that fits your current caseload and upgrade at any time as your requirements grow.

Zero Hidden Costs: Most tiers already include essential features like Image Analysis, reducing the need for expensive add-ons.

What's new in version 4.5

Flexible Options for Every Lab

We offer the flexibility to choose the path that best fits your lab's workflow. While our **Membership Tiers** provide maximum value by bundling software, support, and training into a single subscription, **Perpetual Licenses** remain a robust option for organizations prioritizing traditional ownership.

Current customers have the freedom to maintain their perpetual licenses or seamlessly transition to a membership level at the time of renewal. Regardless of your choice, our licensing is fully customizable to your specific operational needs, and our comprehensive training courses are available to all users. Whether you are a solo practitioner or a large-scale agency, Paraben provides the cutting-edge tools and expertise required to lead in the field of digital forensics.

DIGITAL INVESTIGATOR MEMBERSHIP TIERS

Elevate Your Evidence. Simplify Your Spending.
